PulseBI Studio - Step-by-Step User Manual & Market Guide

Live App: https://pulsebi-studio.streamlit.app/ | GitHub: github.com/Vivaan0510/pulsebi-studio

1. What is PulseBI Studio?

PulseBI Studio is an all-in-one data cleaning, machine learning, and business dashboard platform.
It takes messy CSV or Excel spreadsheets exported from Tally, SAP, or ERP systems and automatically:

1. Scrubs blank/subtotal rows, fixes mixed dates & currencies, and merges misspelled client names.
2. Predicts Customer Churn (0-100% risk) with Explainable AI reasons & forecasts 90-day sales.
3. Builds an interactive Executive Dashboard with What-If profit and pricing sliders.
4. Compiles a 4-table Power BI Star Schema (with Indian Apr-Mar FY) + DAX & Power Query scripts.

2. Step-by-Step Guide: How to Use the Software

STEP 1 - Load Data (Left Sidebar):
- Pick Built-in Dirty B2B Demo Data to test immediately, OR upload your own CSV / Excel file.

STEP 2 - Verify or Override Columns (Top Bar):
- PulseBI auto-detects Date, Customer, Product, Quantity, and Revenue. Click the top expander to remap.

STEP 3 - Tune Controls (Left Sidebar):
- Set RapidFuzz Threshold (75 merges typos; 100 disables), Churn Model, & Forecast Horizon (30/60/90d).

STEP 4 - Explore the 3 Workspace Tabs:
- Tab 1 (PulseScrub ETL): View rows cleaned, inspect merged customer names, and download clean CSV.
- Tab 2 (PulseBoard Dashboard): Inspect 90d Forecast, Pareto 80/20 chart, Churn Watchlist, test the What-If Profit Sliders, and click 1-Click Export Standalone Offline HTML Dashboard.
- Tab 3 (PulseStar Power BI Compiler): Download the 4-table Star Schema (.ZIP or .XLSX) and copy the auto-generated Power BI DAX measures (.dax) and Power Query (.pq) scripts.

3. Real-World Use Cases

- Founders & Business Owners: Spot top 80/20 accounts, save at-risk clients, and forecast cash flow.
- Chartered Accountants (CAs) & Finance Teams: Scrub dirty Tally/ERP dumps and verify client revenue.
- Data Analysts & BI Developers: Automate 80% of manual ETL, Star-Schema modeling, and DAX writing.

4. Competitor Landscape & Target Pricing

- Alteryx Designer: Paid Enterprise (,950/yr | ~Rs. 4.15 Lakhs/yr) - Heavy ETL & basic ML.
- DataRobot: Paid Enterprise (,000+/yr | ~Rs. 25 Lakhs+/yr) - Enterprise AutoML only.
- Akkio / Julius AI: Paid SaaS (to /mo) - Cloud AI charts, no Power BI Star-Schema compiler.
- OpenRefine: Free () - Only cleans text/CSVs; has zero ML, forecasting, dashboards, or DAX.

PulseBI Studio Recommended Pricing:
- Community Tier: Rs. 0 (Free up to 2,500 rows)
- PulseBI Pro (Analysts & SMEs): Rs. 999/month (/mo) up to 250,000 rows
- CA & Agency Suite: Rs. 3,499/month (/mo) for 1M+ rows, 5 seats, bundled with VaultSheet
- Air-Gapped Enterprise Desktop License: Rs. 24,999 one-time () 100% offline executable
